

Event Security

Event Security: Keeping events free from situations

The best laid plans. If you are staging an event as personal as a corporate party or a much bigger event it's worth remembering that your company's good name will be in the hands of the company handling the security. Maxim Securities have built a solid reputation by protecting companies much like your own.

Keeping guests safe... At any public event, people want to feel welcome and safe but inexperienced or aggressive personnel can have the reverse effect. The maxim that people circulate bad experiences more readily than positive ones is true; use the wrong company and your event may be remembered for the wrong reasons.

Our people, protecting your people... All Maxim Securities' event staff are trained to the SIA door supervisor accredited level and hold appropriate licenses. The type of presence and level of security required will decide whether they are highly-visible or discreet, but they are always approachable and non-confrontational. We have the knowledge and experience to prepare for any problems and the training to deal with them should they arise.

...and keeping your event secure. Maxim's bottom line is to keep the event secure and maintain the integrity of the occasion. Maxim meet this objective by creating a climate of confidence that both organisers and customers will appreciate. Maxim Securities will deliver the security package to meet all your needs, allay all your concerns and let you get on with enjoying your event.

Everything you need. We can source everything from response and ejection security, crowd management and entry control stewards right through to hospitality and VIP staff. We have also established an enviable network of contacts in the events industry, so if you need to source medical support, catering or even an electrician we can create a full package for you.

You can't put a price on peace of mind, but you can afford the protection of Maxim Securities.

Maxim Securities use technology and industry standard accredited staff to create and supply a competitive range of detection and protection services. We make protecting your business our business.
