## Key Holding: There when you need us

**Response on demand.** If you value your business or your home enough you will protect it with an alarm. However an alarm can only detect a problem, not respond to it. For complete protection, you need the additional assistance of highly-trained, professional security personnel. You need Maxim Securities' Alarm Activation Response service.

**Ready to go - trained to react.** Security at some premises begins and ends with an activated alarm. However, if you have the protection of Maxim Securities then the alarm is simply the first stage in a well-organised procedure carried out by professional security officers.

**What happens next?** When the alarm is activated a Maxim Securities local response unit will attend the site and investigate the reason for the activation and carry out a thorough external and internal search to find the cause. Maxim's trained and professional staff will handle the situation for you.

**No cause for alarm? No problem.** In the event of a false alarm, our operatives carry out a straightforward alarm reset before securing the premises. The Metropolitan Police have identified that over 92% of all alarm activations nationally are caused by equipment, communication or user error so it is advisable to have a strategy for dealing with them.

**Maxim - on site and in control.** If an intrusion has occurred, then you are in safe hands. Our officers will preserve the integrity of the crime scene and notify the Police. Maxim's priority then switches to reinstating security; we will remain on site until either boarding up or full repairs have been carried out. We will never leave your premises unprotected.

**In person or informed.** You can opt to nominate a key holder to attend alongside our own services or delegate the whole operation and receive a written report the following morning with a follow up call from our management team. Whatever your preference, you're protected.

You can't put a price on peace of mind, but you can afford the protection of Maxim Securities.

Maxim Securities use technology and industry standard accredited staff to create and supply a competitive range of detection and protection services. We make protecting your business our business.
