

Remote Monitoring

Remote Monitoring: Detection and protection

If you can't be there - be aware. Whatever your line of business, in such a competitive world you need protection to survive. Maxim has developed a range of Remote Monitoring services that will cover all your needs and protect your assets.

CCTV Monitoring. A Maxim Securities CCTV camera utilising IP or internet based technology - and Maxim Securities' round-the-clock CCTV Monitoring Service - provides highly-focused protection for your business.

Do you play it by ear... Maxim Securities' Audio Monitoring and Activation Services use a normal telephone or mobile phone line to provide secured entry to your buildings from anywhere, and to enable remote alarm operation and control.

Or 'in card we trust'? Who goes there? Our Remote Entry Service lets you view - remotely - what the card reader entry system sees and can validate customer personnel from ID cards read by door-entry systems.

Making it happen. Maxim Securities works in partnership with our sister company Maxim Telecommunications to deliver all your advanced security requirements. Whether we are setting up your motion detectors or focusing on your cameras - we have the equipment and the expertise to protect your business.

End to end service. Maxim's control room is staffed by experienced security personnel trained to know what to look for, and how to react when they see it. Maxim will liaise with the emergency services to prevent a situation becoming a problem.

You can't put a price on peace of mind, but you can afford the protection of Maxim Securities.

Maxim Securities use technology and industry standard accredited staff to create and supply a competitive range of detection and protection services. We make protecting your business our business.
